DETAILED ACTION

1. This Office action is responsive to the Applicants' Response filed 05-01-2003. After further reviewing the application, the Examiner found that the specification as originally filed lacks support for the pending claims 63-97. The rejection is given below.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 63-97 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

In the independent claims 63, 82, 85, 87, 89, 91 and 96, the specification only teaches a memory array with a plurality of data cells, but fails to provide support for the subject matter "a memory array comprising of a plurality of ...address cells". Note that this limitation is clearly taught by Kiriata et al. (U.S. Patent 6,141,267) as elements 232-1 in figure 2. Therefore claims 63-97 are rejected for lacking support from the description.
